»» ABOUT US »»

Here at HiTech Blinds we enjoy coming to work each day as we're excited to offer you great quality blinds at an amazing value. Everyone takes pleasure in life's little luxuries and we want you to experience this through the amazing transformation that HiTech Blinds can make.

All of the directors have decades of industry experience and after seeing fads and trends come and go, it was clear that blinds within glass was the future and we wanted to be a part of it. HiTech Blinds was 'born' and we have been making customers happy ever since.

Quality has always been at the forefront of our business and delivering value for money is also an essential component. Our products are specifically selected with this in mind and the HiTech range of blinds fit the criteria.

The HTV Blinds are tested to 10,000 repetitive cycles on both lift and tilt functions which to our knowledge, is unique in the UK to HiTech Blinds. Watch the test video on our website - www.hitechblinds.co.uk

HITECH BLINDS

➤ Energy Efficient ➤

Provides the thermal performance of insulated glass with the additional benefits of operable integral blinds. Not only do our blinds provide control over privacy and natural light, but they also let homeowners control the amount of solar heat that enters the room

All our units conform to **BSEN 1279**

HiTech Blinds are hermetically sealed, argon filled and conform to **BSEN 1279**

and are fully CE accredited.

Visual Privacy – Create a wide open view or enjoy complete privacy

Ideal for windows, bi-fold doors & conservatories

HiTech Blinds

are sole manufacturers of blinds sealed between two panes of glass, forming a glass unit. Our experts here at HiTech Blinds have been manufacturing Integral Blinds longer than anyone else in the UK, with over 27 years' experience with the product. We have a strong commitment to offering high quality glazing solutions, while providing excellent customer service and unbeatable prices.

- No dusting, easy to maintain
- Available in a variety of colour options
- Blinds move in sync with doors and windows, and are unobtrusive
- Blinds are hermetically sealed between two panes of glass

➤ IT ALL STARTED WITH A PASSION ➤

It all started with a passion, to supply the highest quality Integrated Blinds in the UK. Offering unique features to improve their functionality, appearance, usability and durability – and we've done just that. Our vision is to supply the highest quality Integral Blinds in the industry, providing excellent customer service at the same time.

Let's imagine your double-glazed windows in your home, they are made up of 1 pane of glass, followed by a cavity (space in between), and then another pane of glass, making a sealed double-glazed window unit, they are then installed into your window frames. HiTech Blinds are built the same way, except the blind is inserted between the panes of glass.

➤ Integral Blinds by HiTech Blinds ➤

- Dust free, hygienic and maintenance free.
- Maintain privacy whilst allowing light in.
- Ideal in rooms where blinds could get wet, such as kitchens and bathrooms.
- No dust, moisture or bacteria build-up.
- A modern and stylish look, available in standard & bespoke colour options.
- Designed with safety in mind, no external cords.
- Easy to operate with our advanced magnetic system.

➤ SLIDER CONTROL ➤

Our magnetic integrated blinds are a simple, yet functional manually operated system. Operate the blinds by simply sliding the magnetic control up and down the control zone.

The magnets move up and down with ease, which in turn move high strength magnets up and down the side rails. The blinds move twice the distance that you move the controls, saving you time and effort. The blinds raise, lower and tilt functions are achieved using a magnetic transmission through the glass, thereby guaranteeing the unit's hermetic seal. These blinds are manufactured to the internal sizes of the sealed units, fitting neatly between the two panes of glass.

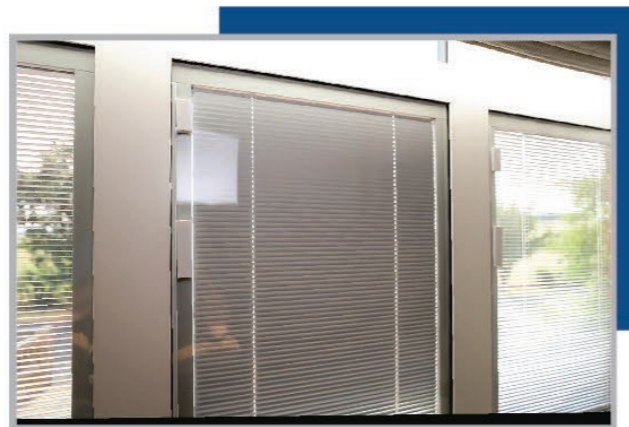

MAGNETIC BLINDS COLOUR OPTIONS

HiTech blinds are mechanically cycle tested to 10,000 repetitions

Here at HiTech Blinds, we take great pride in ensuring we only provide products of exceptional quality. To ensure our blinds meet the standard of quality we demand our integral blinds are rigorously tested. Each week, 2 sample blinds are selected from the current batch and mechanically cycle tested to 10,000 repetitions – on both the raising and lowering, and the tilting function.

These cycles test the full extent of the blinds capabilities to ensure that the product you receive is to the highest standards. Therefore, we offer a full 10 year guarantee on all of our sealed units.

We have two types of venetian blinds suitable for the glazing cavity of 16mm, and 20mm. This allows many varied combinations of HiTech Blinds including the use with triple glazing, Georgian bars and slim 24mm units.

A standard 28mm unit would comprise 4mm Low E /20mm Argon Gas filled cavity with a blind / 4mm Toughened Clear.

The colour options are endless

Our Integral Blinds are available in any colour to match your project requirements.

Standard (Inc dual colour & metallic options)

8 Frame Colours - White, Cream, Grey, Brown, Dark Brown, Anthracite, Black & Metallic Silver

BY007 – Dark Brown	Blinds Framing & Slats
BY014 – Rose Gold	Slats only
BY001 – White	Blinds Framing & Slats
BY005 – Grey	Blinds Framing & Slats
BY013 – Gold	Slats only

Dual Colour – BY001 White inside / Anthracite Grey outside / Slats only

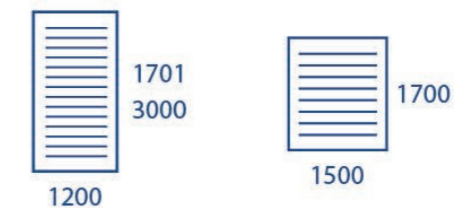

* Colours are representative only, please request a colour swatch for accurate colours

Operated by an easy-to-use, neat magnet slider to raise, tilt and lower the blinds inside the sealed unit. No cords, and symmetrical sightlines.

- All units below 300mm height are tilt only and all over 301mm height are lift and tilt as standard.

We can process some huge blind sizes and the maximum width is determined by the height.

- Single blinds with a width of 1500mm or less can go to a height of 1700mm but if the width is 1200mm or less the height can go to 3000mm.

- Double Blinds. Our unique double blinds allow 2 blinds within 1 sealed unit. The sizing limits work in the same way but you can go to double the width!

Double Blinds. Our unique double blinds allow 2 blinds within 1 sealed unit. The sizing limits work in the same way but you can go to double the width!
