A suite of beautiful windows and doors with a flush frame design

If you're looking for seamless style in your next home improvements, look no further than the stunning range of flush-finish products from VEKA Group. These revolutionary PVC-U systems have been designed 'from the ground up' and all feature an elegant, understated flush finish.

Timeless style is just one half of the equation. The range also encompasses a huge number of technical innovations and energy efficiency benefits.

The **Imagine Bi-Fold Door** folds back to take up only the tiniest amount of space, the **Imagine French Door** locks neatly together without any need for a central pillar and **FlushSash windows** are so true to the look of traditional timber frames that they can be used for home renovations in controlled conservation areas! And that's just the beginning, the list of benefits for each system goes on and on....

FlushSash

Period style with present-day performance – FlushSash windows from VEKA Group

With the FlushSash window, VEKA Group has created the perfect PVC-U solution for homeowners who wish to retain their home's beautiful period styling combined with the benefits of cutting-edge, modern hardware and materials.

FlushSash windows mimic the look of traditional timber frames, offering classic, understated style. Thanks to their authentic aesthetics, they have even been specified in controlled conservation areas. There's the option to choose Georgian bars as well as 29 different colour and woodgrain finishes, enabling FlushSash to be tailored to virtually any home.

Monkey tail handles and ornamental peg stays are available to continue the traditional appearance inside, along with the option for a different interior frame colour.

Ideal for homeowners tired of the damp, draughty living associated with ill-fitting, single-glazed timber frames, FlushSash windows boast the superior thermal performance you would expect of a VEKA Group product.

PVC-U frames don't rot, split or swell, and there's no need to ever sand or paint them – an occasional wipe with soapy water is all that's required to keep them looking at their best.

Besides keeping the warmth in and the cold out, thus reducing your heating bills, FlushSash windows minimise the risk of condensation and reduce outside noise (particularly if you opt for triple-glazed units).

They may look traditional but their security performance is distinctly modern with multi-point locking, industry-leading hardware and keylocking handles to keep intruders at bay.

Meeting or surpassing all applicable British Standards and holding all relevant accreditations, FlushSash is the traditional-looking window with modern performance that heritage homeowners have been waiting for.

BI-FOLD DOORS

Enjoy the best attributes of in and outdoor living with VEKA Group's striking and impressive Imagine Bi-Fold Door. Representing a revolution in bi-fold design, the elegant, flush finish of the Imagine Bi-Fold Door houses a host of technical innovations, combined to create a truly world class product

Slender sightlines allow light to fill your home whether the door is open or closed, and offer virtually unhindered views of your outdoor space.

Cast the door open for a light and airy home that gracefully unfolds into the great outdoors. The flush finish of the Imagine Bi-Fold allows its sashes to 'concertina' on themselves, effortlessly and inconspicuously stowing away using minimal space. Homeowners can even choose whether the door folds inwards or outwards.

Imagine Bi-Fold Doors can be up to six metres wide with individual sashes of up to a metre in width. An amazing 16 sash configurations lend this versatile design to virtually any home – it can even be used to separate internal areas.

Finally, a choice of 29 colour and woodgrain options further allow you to personalise the Imagine Bi-Fold Door for your home. Why not opt to use different finishes for the inward and outward-facing sides to complement your interior design scheme?

As well as letting the sunshine and fresh air flood in, Imagine Bi-Fold Doors are equally adept at keeping the cold and bad weather at bay. Their excellent thermal insulation also translates into impressive noise reduction – improved yet further with the option of triple glazing.

With ERA's bespoke hardware and multi-point locking mechanisms neatly encased in the Imagine Bi-Fold Door's frame, you can rest assured that your home is safe, sound and secure, and meets both PAS 24 and Secured by Design security accreditations. Plus, there's the peace of mind offered by the ERA Five Star Guarantee. Visit erafivestar.com to find out more.

There's a choice of three different thresholds, so you can specify the one that best suits your needs; ultra low thresholds offer easy access for people with mobility difficulties.

Each Imagine Bi-Fold Door is made-to-measure but can be assembled on site, so it can be carried through the house to reach difficult-to-access areas. This means that installation is clean, quick and hassle free.

BEFORE

AFTER

The **Imagine Bi-Fold Door** makes an attractive alternative to a traditional sliding patio door; completely opening your home up to the garden or patio.

FRENCH DOORS

Designed without compromise, VEKA Group's Imagine French Door is truly one of a kind. Its simple, elegant sightlines and flush finish encase a host of innovative technical features that result in a truly world class product.

Created in the UK for the UK market, the Imagine French Door, like its Bi-Fold counterpart, was developed alongside ERA, one of the country's top names in security and lock mechanisms. ERA's Five Star Guarantee offers homeowners significant reductions on their home insurance and a wealth of other valuable benefits including up to £5000 in compensation in the unlikely event of a break-in through an Imagine Bi-Fold or French Door. Designed to meet both PAS 24 and Secured By Design accreditations, the Imagine French door represents a formidable barrier against intruders, even when installed with an ultra-low threshold – one of the three options available.

Compliant with Part M - the Government's guidance on Access to and Use of Buildings – the low threshold option, used with ramps, provides simple access for wheelchair users and people with mobility difficulties.

A truly versatile design, the Imagine French door is available with a choice of bevelled or sculptured sashes and glazing beads and will accept either double or triple glazing – providing excellent thermal performance.

The extensive range of coloured and woodgrain finishes mean that you can match the French Door to existing windows, or make a striking feature of your new doors.

Enhance your home with VEKA Group's beautiful Imagine French Door.

imagine
RESIDENTIAL DOORS

Homeowners can now benefit from all the technical innovations and elegant, understated styling of VEKA Group's Imagine French Door in a single residential door – ideal for use as a front or back door.

With ERA's durable, bespoke-designed hardware and multi-point locks, incorporated into the frame as standard, you can rest assured that your home's entryway is safe and secure and, as with the Imagine French Door, a beautiful flush finish adds that flawless touch of class.

With three threshold levels available, the Imagine residential door is ideal for use as either an exterior or vestibule door. The low threshold is DDA and Part M compliant when used with wheelchair ramps and, with the option to add a central beam, the door has ample space for letter plates and other door furniture.

Pick a colour

All of the beautiful flush finish products in this brochure are available in a range of 29 colours and woodgrain options, allowing you to perfectly complement your home.

Keep it classic with cool cream or white, go contemporary with grey or black, or reflect your personality with a considered choice from our green, blue and brown hues.

If you like the look of timber, but don't want the maintenance that comes with a wooden door, check out our extensive selection of woodgrain finishes - renowned as some of the industry's most realistic. We even offer a white woodgrain option for those wanting to add a textured woodgrain effect to the popular colour choice.

Your installer can help advise you on the perfect, stylish finish for your doors and windows – but ultimately the choice is yours! Make your home as unique as you are.
