COMPOSITE DOORS

Traditional and Contemporary styles

Secured by Design

Official Police Security Initiative

A STUNNING AND SECURE ADDITION TO ANY HOME

Superior looks and performance from one of the UK's leading home improvement manufacturers – this is the VEKA composite door.

Our composite doors offer all the traditional good looks of timber without any of the drawbacks. While timber may crack, split or warp and of course, need regular sanding and re-painting, uPVC requires very little maintenance and offers all the security, performance and long-life expectancy of modern materials.

The tough GRP surface is highly scratch-resistant and will help it keep that 'new look' finish through its long life. This is mounted onto a composite material sub-frame, supported by laminated timber stiffeners and pressure filled with energy-efficient foam. The outer edge of the door is protected with a hard wearing uPVC strip that provides a neat and durable finish.

Security of valued possessions and protecting loved ones are the main priority of any homeowner. Our composite doors have been designed to exceed even the most stringent of expectations. This is why we have incorporated a number of security features as standard.

All VEKA composite doors are fitted with the neat and unobtrusive 2DC butt hinge designed with longevity in mind, these robust, precision-engineered hinge allow lateral and horizontal adjustment by the removal of the interchangeable cover caps and come in a choice of 9 colours.

- As standard the threshold is 70mm uPVC but this can be altered to an aluminium low threshold with the option of a wheelchair friendly ramp.
- Upgrade to the AV2 and AV2 Heritage Automatic Door Lock for an automatic locking door which throws the hooks and deadbolts, making your home instantly secure.

2DC Butt Hinge

AV2 Heritage Door Lock

ABOUT VEKA

The VEKA UK Group have pioneered the design and manufacture of window and door systems for over 30 years. With a continual investment in VEKA and Halo profile systems the brands are now some of the most technically advanced on the market. A 10 year guarantee on all products, gives the added confidence that once fitted VEKA and Halo products will last for years to come. Just a few of the reasons why they are now one of the most specified uPVC systems in the world.

A fantastic addition to the entrance of any home, with a wide selection of styles, glazing options and hardware, there is a combination perfect for your home.

YOUR STYLE AND COLOUR

The first decisions in designing your new front door are deciding on the style and colour.

- Choose from over 40 door designs.
- 40 colour options, including woodgrains and colour match option to any RAL colour.
- Supplied in a VEKA or Halo outer frame.

YOUR GLAZING OPTIONS

The glass you choose is as important as the style and colour. We have a wide array of glass designs perfectly suited for each type of door.

Choosing the right glass options can really be a focal point for your door.

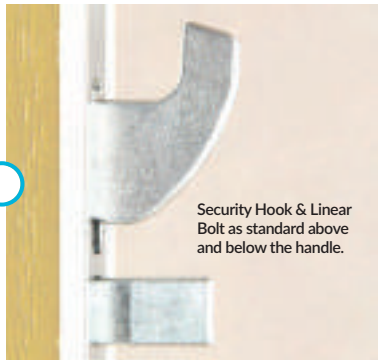
YOUR HARDWARE OPTIONS

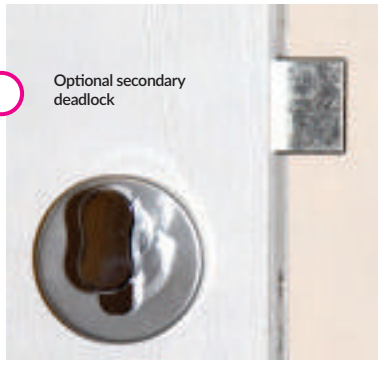
The hardware you choose gives your door its own individual look and is available in a wide range of colours.

Choosing the right hardware makes a statement about you and your home.

A MUCH MORE SECURE HOME

We've managed to strike the perfect balance with our doors, they look warm and welcoming to visitors, but be assured that they are fitted with top of the range hardware to provide a formidable barrier against any intruders to keep your home and loved ones safe at all times.





Security of valued possessions and protecting loved ones are the main priority of any homeowner. Our composite doors have been designed to exceed even the most stringent of expectations. This is why we have incorporated a number of security features as standard.

- Security hooks at the top and bottom of the door.
- Fitted with a neat and unobtrusive 2DC hinge, designed with longevity in mind; these simple hinges give the minimum of adjustment by the use of the removable covers and come in a choice of 5 colours.
- Ultion Diamond Secure Cylinder Lock supplied on all doors - details opposite.
- Optional upgrade available for PAS 24 certification - The security standard.

Our hardware specification is approved by MACO, a leading manufacturer of security locking hardware. Our composite doors meet the rigorous standards demanded for compliance to the MACO Secure Plus Scheme. This unique scheme recognises how home security is paramount and endorses products incorporating its locks by offering an independent guarantee and warranty.

Further Optional Upgrades

In addition to the standard security features that will be added to your door, there are a number of optional upgrades:

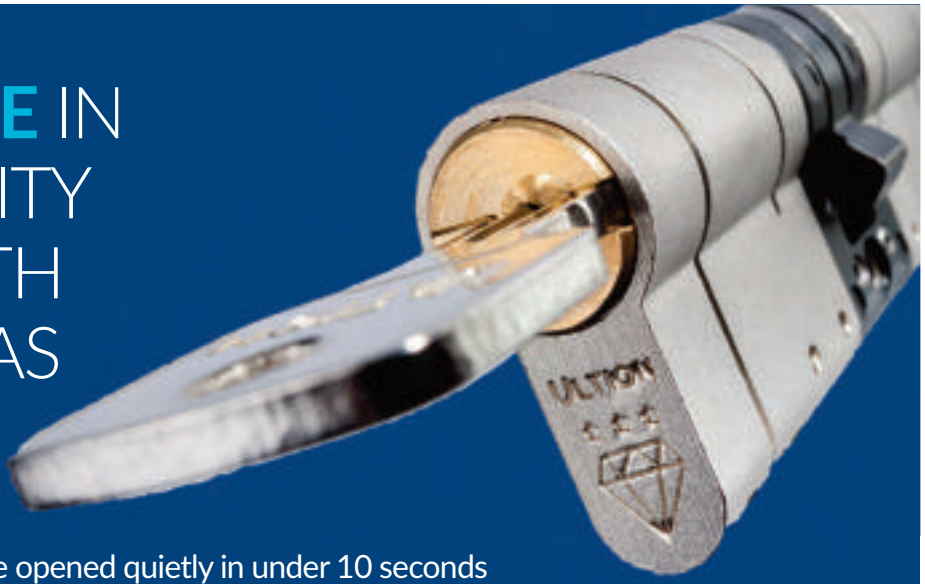
Secondary Deadlock - Upgrade to a secondary deadlock with thumbturn Cylinder that operates independently of the main lock. This is located at shoulder height and operated by a simple thumbturn, which throws a 20mm dead bolt into the frame for additional security.

Door Hinges - You have the 2DC hinge which is designed with greater adjustment for doors being fitted into older properties where it might be needed and it is also available. Available in 12 colours making it a fantastic option for outward opening doors.

AV2 & AV2 Heritage Automatic Door Lock - Upgrade to an automatic locking door. This lock negates the need for a lever/lever door handle. You just pull or push the door closed with the bar handle and it automatically throws the hooks and dead bolt, making your home secure. When leaving your home or going to bed just simply turn the key to deadlock everything into position.

Secured by Design - Optional upgrades to Secured by Design with the addition of a number of security features. Just ask for 'Secured by Design' and we will make sure all the additional safety features to comply will be added to your door.

THE **ULTIMATE** IN DOOR SECURITY SUPPLIED WITH OUR DOORS AS STANDARD



Millions of doors in the UK can be opened quietly in under 10 seconds with normal tools. Even the most secure multi-point hook mechanisms are disabled when the cylinder lock is snapped.

Still protects when they key is inside the lock

Something many of us are guilty of is leaving the key in the lock on the inside. Even with the most snap secure locks leaving the key in the lock can completely remove any snap protection you thought you had. But not with the Ultion!

Attack forces lockdown mode

The moment that Ultion detects forced entry it activates an attack lock directly into the central cam, this is 'Lockdown Mode'. Even if the most determined intruder gets past Ultion's two sacrificial sections he won't get to the attack lock because it is protected deep inside a solid molybdenum core and secured with a dedicated retaining pin. When Ultion is in lockdown mode your home and family are safe.

This is why we have chosen to incorporate the Ultion Diamond secure lock with all of our composite doors. When the Ultion detects attack a hidden lock automatically engages. Even in lockdown mode it stops the intruder from opening your door.

Even after the failed attempt, your door can still be opened and locked from the inside.

The Ultion has been rigorously tested, nothing has beaten it. Not even the finest 3 star locks, making the Ultion the most secure lock on the market.

For more information on Ultion and the benefits visit: www.ultion-lock.co.uk

If an intruder snaps Ultion and breaks into your home, Ultion will pay you*£1000.

*your lock must be registered

WHAT IS SECURED BY DESIGN?

Secured by Design

SBD

Official Police Security Initiative

Secured by Design is the official UK Police flagship scheme which recognises products incorporating effective crime prevention solutions at the design stage and only awards accreditation to products which pass their stringent testing.

www.securedbydesign.com

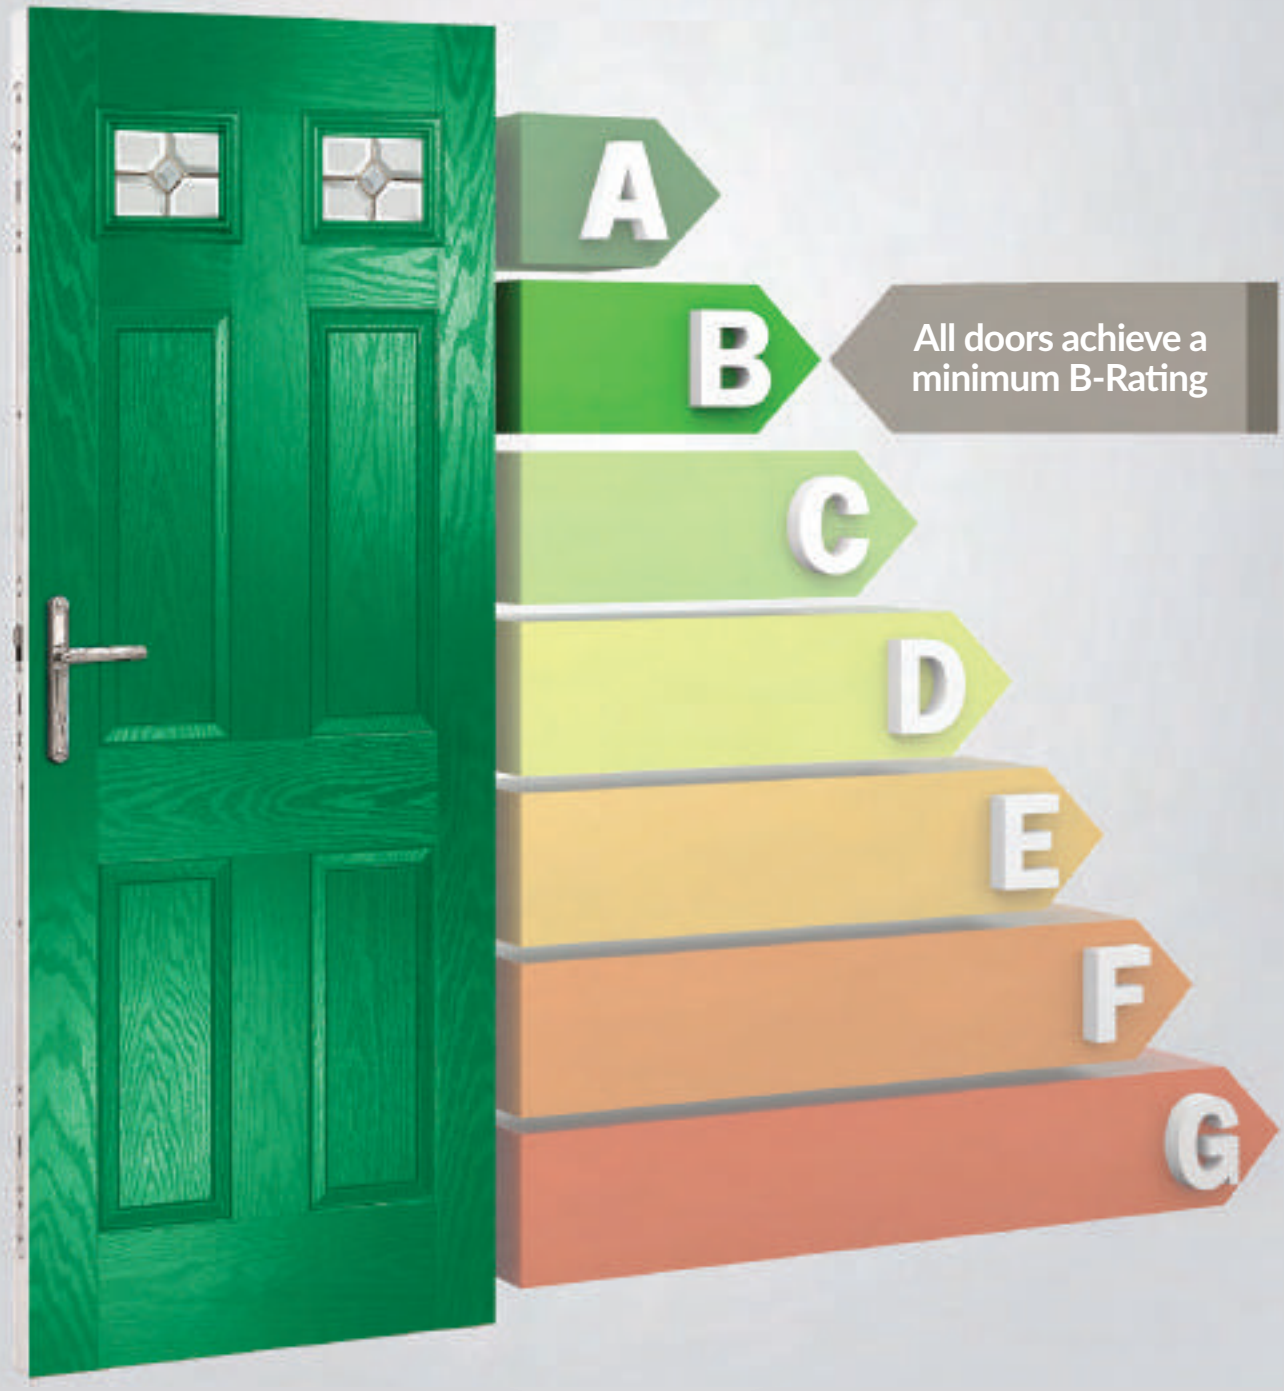
Specifying 'Secured by Design' on your order ensures your door will be manufactured to the ultimate security specification for complete peace of mind and protection of your home.

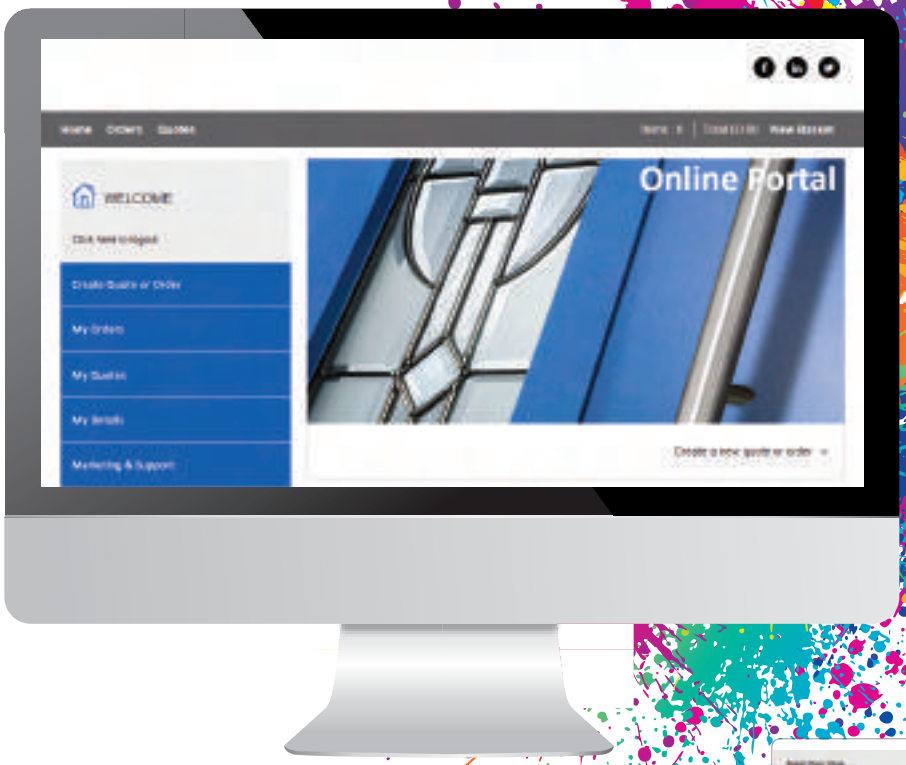
THERMAL PERFORMANCE

Composite doors are much more thermally efficient than either timber or PVC, and our doors are manufactured to the highest quality standards, making them more thermally efficient by design.

The warm foam core allows the door to have a significantly better 'U' value than traditional timber doors, PVC skinned timber doors and steel doors, and our entire range meets with the requirements of the current Building Regulations.

There are various upgrades to glass options which increase the thermal performance of the door. The combination should keep your home warmer and could help reduce your energy bills.





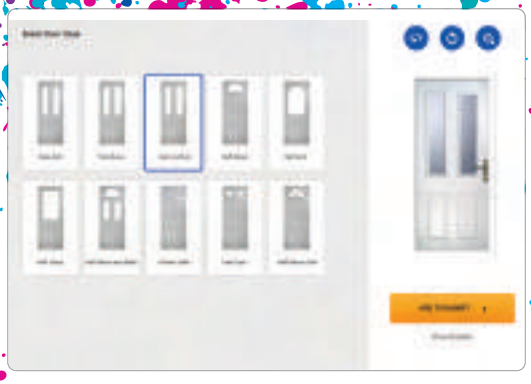
DESIGN AND VIEW YOUR PERFECT DOOR...

With such a wide selection of styles, colours, hardware and glazing options available for your new door, it can sometimes be difficult to visualise what you need. Our door designer lets you see just that and even lets you upload a picture of your home to see exactly how your choices will look in reality.

You're the Designer

Choose your style, then your colour, completely change the look with the various glazing options and then complete the look with your choice of hardware. Don't leave it to guesswork, we can show you exactly how your choices will look in your home with our online designer. We'll take you through the choices, upload a picture of your home and superimpose the door you have designed to ensure your choice complements it perfectly.

There are so many combinations that it's often difficult to know which ones are right for you until you see it in place. Make sure you make the right choices by designing your ideal door on our door designer.



Choose your Door Style

TRADITIONAL DOORS

The range of traditional doors are designed to replicate the most popular timber doors and come with highly defined mouldings and realistic wood-grain embossing on the surface. Whether used in a Victorian home, a modern townhouse or a farmhouse cottage, these doors always add to the appearance of the entrance.

These doors are transformed by the choice of decorative glass and colours, with 40 door colours available and a huge range of glass options, from the simple diamonds of Classic, through to the stunning multi-faced bevelling and black chrome caming of Reflections, these doors can make a real statement.

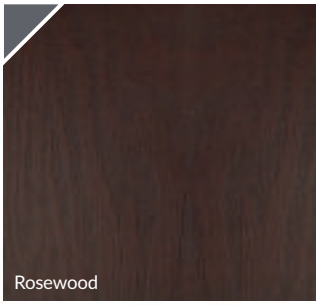
Black

Golden Oak



Rosewood

Premium Colours

Our range of 32 premium colours are created using state-of-the-art coating technologies as used in the yacht industry and maintain the grained timber effect of the door skin. The paint has been prepared to the recommended gloss level which range from a Semi-Matt, Satin or Semi-Gloss sheen dependent upon colour. Door colours and stains shown in this brochure are for guidance only, however due to the nature of the material, batch and print restrictions there may be a difference between them which is unavoidable and for which we cannot accept any liability.

- The door is filled with CFC-Free Polyurethane Foam density 44.5 - 45.5kg/m^3
- Superior heat and sound insulation
- Complimentary choice of grained reglazeable cassettes
- Centre Pane Value of approximately 0.44
- Doors have exceeded the requirements of PAS24
- Q-Marked with full manufacturing traceability

Glass

All the double and triple glazed units used in our doors are manufactured to the highest standard and come with internationally recognised accreditations for performance, strength and thermal efficiency.

High Performance Units
All units are made with toughened glass to comply with EN12150, the International standard for safety glass. All units are manufactured to the EN1279 standard for quality of seal and life expectancy and come with a manufacturer's 10 year warranty.

Thermally Efficient
All the glass in our range comes with Energy Plus as standard. They are manufactured using Pilkington K low emissivity glass and the airspace is filled with Argon gas to give industry leading thermal efficiency.
In addition we only use warm edge spacer systems with Superspacer and DecoSeal.

Security Option
All our glazing options can be supplied with a Security Plus upgrade where the outer pane of toughened glass is replaced with breakthrough resistant laminated glass.

Care and Maintenance

Your new door should keep safe and secure for years to come however with all products and especially those that are exposed to the elements we recommend that you carry out a care and maintenance routine.

- Door frames should be washed with warm soapy water, however stubborn stains can be removed using specialist PVC-u cleaners and by following the manufacturers' guidelines.
- The door leaf should only be cleaned using warm water or non-aggressive composite door wipes. No solvent-based product or abrasives should be used as these will damage the surface of the skin.
- External glass should be cleaned with warm soapy water and cleaned with a proprietary glass cleaner.
- Hardware can be cleaned with a mild detergent and wiped clean. No harsh chemicals or abrasives should be used.
- Maintenance of the door may be required to maintain any guarantees from the installer. Hinges should be lubricated with engineering oil. Cylinders can be lubricated with Teflon-based products only, as other oils may cause degradation. If necessary, a small amount of lubricant can be applied to the moving parts such as letterplates, handles and knockers.

WHY CHOOSE THE VEKA COMPOSITE DOOR

Minimal maintenance...
No painting or warping, just a simple wipe down

Much more secure...
Fitted with ultion cylinder and achieving SBD

Give your home a unique entrance...
With a range of styles, colours and hardware

Supplied and fitted...
by your local, reputable installer
